

Pizza42 + Auth0 Presentation Talk Track

This guide explains how to walk through each slide naturally, confidently, and conversationally during the interview presentation.

Slide 1 — Title

Goal	Set the tone and explain the business goal.
Suggested Talk Track	“Today I’ll walk through how Pizza42 could modernize customer identity using Auth0. The goal is to create a seamless, secure, and scalable identity solution for our users.”
Presentation Tip	Keep this short and confident.

Slide 2 — Business Goals

Goal	Show empathy for different stakeholder priorities.
Suggested Talk Track	“Security wanted reduced credential liability. Product wanted frictionless onboarding. Marketing wanted a unified customer view. We needed a solution that addressed all three.”
Presentation Tip	Focus on business value, not protocols.

Slide 3 — Why Auth0

Goal	Explain why Auth0 solves these challenges well.
Suggested Talk Track	“Auth0 centralizes authentication, secures APIs, reduces password liability, and allows Pizza42 to integrate with existing systems quickly and securely.”
Presentation Tip	Avoid deep technical detail here.

Slide 4 — Requirements Checklist

Goal	Demonstrate that every requirement was implemented.
Suggested Talk Track	“This checklist guided the architecture and implementation decisions throughout the build.”

Presentation Tip	Do not read every line.
------------------	-------------------------

Slide 5 — Demo Agenda

Goal	Transition into the live demo.
Suggested Talk Track	“I’ll now walk through the customer journey end-to-end and show how the architecture solves
Presentation Tip	This should feel like a transition slide.

Live Demo

Goal	Show the solution working from Pizza42’s perspective.
Suggested Talk Track	Walk through signup, login, blocked unverified order, verified order, metadata update, and pe
Presentation Tip	Narrate meaning, not mouse clicks.

Slide 6 — Identity Responsibilities

Goal	Explain why responsibilities were separated.
Suggested Talk Track	“Authentication, authorization, and privileged backend operations were intentionally isolated i
Presentation Tip	This is a key architecture slide.

Slide 7 — OAuth Flows

Goal	Explain why each OAuth flow was selected.
Suggested Talk Track	“The SPA uses Authorization Code Flow with PKCE. The backend uses Client Credentials. R
Presentation Tip	Emphasize intentional design decisions.

Slide 8 — Tokens

Goal	Clarify the role of each token type.
Suggested Talk Track	“The ID token represents user identity. The access token authorizes APIs. The refresh token
Presentation Tip	Keep this simple.

Slide 9 — Scopes vs RBAC

Goal	Show scalability thinking.
Suggested Talk Track	“The POC intentionally starts lightweight with scopes, while still allowing the platform to evolve
Presentation Tip	This demonstrates architectural maturity.

Slide 10 — Passkeys

Goal	Connect passkeys to stakeholder value.
Suggested Talk Track	“Passkeys improve both security and customer experience simultaneously while reducing pas
Presentation Tip	Talk business outcomes, not WebAuthn internals.

Slide 11 — Tenant Configuration

Goal	Show implementation credibility.
Suggested Talk Track	“This slide shows the tenant-side implementation supporting the demo: applications, APIs, Ac
Presentation Tip	Keep concise.

Slide 12 — Code Walkthrough

Goal	Explain implementation logic at a high level.
Suggested Talk Track	“The backend validates every access token independently, while Actions enrich tokens with p
Presentation Tip	Avoid deep code review energy.

Slide 13 — Security Controls

Goal	Explain defense-in-depth.
Suggested Talk Track	“No single control is trusted alone. The architecture layers JWT validation, scope enforcement
Presentation Tip	Strong security credibility slide.

Slide 14 — Key Takeaways

Goal	Reconnect technology back to business value.
Suggested Talk Track	“The result is a scalable CIAM architecture balancing security, customer experience, and ope
Presentation Tip	Slow down slightly here.

Closing

Goal	End strategically and confidently.
Suggested Talk Track	“Identity is no longer just a login problem. It impacts security, customer conversion, operation
Presentation Tip	Pause confidently before Q&A.
